introduction

Existence is never a fixed point; it is a fluid, shifting frequency. States of Being explores those quiet internal moments, the weight of identity, and the simple, profound act of moving through the world.

The artists featured in this collection step beyond mere documentation to capture the actual experience of presence. The works on display navigate the tension between the physical body and the mind's internal spaces. Some pieces are anchored heavily in reality and the physical form, while others drift entirely into psychological landscapes, making an internal mood or a sudden shift in consciousness visible for just a moment.

Together, these works form a collective study of the human condition. As you explore the gallery, we invite you to pause, connect with the different frequencies on display, and reflect on what it means to simply exist right now.

To purchase an artwork, please use the artist's contact link available on the exhibition website.
